I) “ ... fails to disclose creating a decision tree; compiling the decision tree into a data file; and converting the data file into one or more computer viewable documents.”

Art Unit: 2121

In the response to applicant's argument:

I) [0266] FIGS. 12A to 12C are a pseudo code representation of one embodiment of the decision tree that implements the decision tree. FIGS. 13A and 13B are a portion of an actual XML decision tree. Moreover, FIGS. 13A and 13B are portions of an actual decision tree used in generating the display of FIG. 10. Furthermore, *if you have program code representing a logical entity, it has to be compiled in order to implement and interface with the application.*

[0267] In general, the decision tree follows the rules of a well-formed XML document.

The decision tree includes a hierarchically organized data structure composed of connected nodes beginning with a root that is defined as file HTMLTemplate.jsp.
